Product Description

New Holland U80D Track Loader

New Holland's tractor loader model U80D provides profit-producing potential on both the front and back with 74 HP and the clean power of a Tier 4 Final certified engine. You get responsive power at both bucket and hitch, so this machine pays its way by loading, stacking, scraping and leveling. The performance capabilities of the U80D reveal how job site domination is just a loader away.

New Holland tractor loader U80D brings a sense of ease to completing job site tasks. Leverage 6,503 lbs (2950 kg) of lift capacity to full height using a long lip bucket and 6,537 lbs (2965 kg) using a 4-in-1 bucket. From the lowest point in hitch position, the machine yields 2,500 lbs (11,121 N) of lift capacity and 2,984 lbs (13,274 N) at the highest point.

The fully integrated loader control lever allows the operator to manage all loader and front auxiliary functions comfortably in one location.
