Product Description

New Holland E70D Midi Excavator

Operators are going to find a machine uniquely built for them and their needs with the powerful performance within E70D's compact frame. This excavator is meticulously crafted to excel in confined spaces where larger machines fall short. Ideal for small-to-medium-sized construction companies, landscapers, municipalities, and farmers, the E70D can handle a variety of tasks with ease — from digging and grading to material handling.

Impressive specifications and versatile design are intrinsic to the E70D making it a standout model. Weighing in at 16,072 lbs (7290 kg), it strikes the perfect balance between strength and agility. It delivers a dig depth of up to 168.1 inches (4269 mm) and a dump height of 180 inches (4572 mm) and is engineered for peak performance in a variety of conditions. Sporting a distinctive monoboom design that ensures superior maneuverability, the machine allows operators to navigate tight spaces and challenging jobsites with ease.
