Product Description

New Holland Workmaster 120 Tractor

BEST-IN-CLASS VALUE CAB Value and comfort are not mutually exclusive. The all-weather WORKMASTER™ four-post cab protects you from the elements and is loaded with comfort features not found on other value cabs.

EXCEPTIONAL VIEW Enjoy the added ease and confidence that come with an exceptional view to your work. The WORKMASTER cab boasts 316-degree visibility and an optional high-visibility roof panel, so you can look overhead to a raised loader when stacking or dumping.

POWERFULLY EFFICIENT WORKMASTER 95, 105 and 120 tractors are powered by 207-cubic-inch (3.4L), 4-cylinder engines built by Fiat Powertrain Technologies (FPT). These engines are Tier 4B emission compliant, and deliver clean, fuel-efficient power.

HIGH-PRODUCTIVITY POWER SHUTTLE The 12x12 transmission with steering column mounted hydraulic power shuttle provides fingertip access during jobs that require frequent forward-reverse shifting, like loading, grading and mowing.
