Product Description

New Holland BigBaler PLUS Large Square Baler

THE RIGHT BIGBALER FOR YOU The BigBaler PLUS Series is available in 3'x3' and 3'x4' bale sizes. Select a standard model or increase bale density with a CropCutter® crop processing system. A wide range of productivity-enhancing options from axles to automation is available.

WHAT'S THE PLUS ABOUT? The BigBaler PLUS Series features a bale chamber that's 31.5 inches (.80 m) longer than prior series. This results in a softer bale drop, bales that are up to 10% denser, and more consistent bale density.

OPTIMIZE YOUR PRODUCTIVITY By combining SmartSteer™ swath guidance and the IntelliCruise™ feed rate control system, IntelliSense™ bale automation features a LiDAR sensor for hands-free baling day or night.

NOT YOUR AVERAGE KNOT The Loop Master™ double knotting system produces stronger knots for fewer broken bales and eliminates twine offcuts for cleaner fields and feed, saving nearly four miles of twine saved every 10,000 bales.
