Product Description

New Holland Discbine® PLUS Center-Pivot Disc Mower

CLEANER AND CLOSER CUTTING Get the cleanest and closest cut yet with the MowMax™ II PLUS true modular cutter bar. Faster knife tip speed, a slimmer cutter bar profile, and reshaped rock guards improve cut quality while providing a 30% lower cutting height.

TIME-SAVING INNOVATIONS The standard QuickMax™ knife-change system and ShockPRO™ hubs are designed to save you hassle when you're making hay. For ultimate peace of mind, a 2-year base warranty is standard along with an additional year of MowMax™ cutterbar warranty so you can cut with even more confidence.

PIVOT TO GREATER PRODUCTIVITY Whether you need a nimble mower to enter tight places or a big capacity for wide-open spaces, four center-pivot models, with cut widths from 10 to 16 ft. (3 to 5 m) wide, are designed and built with pride in New Holland, Pennsylvania.

FROM WIDE SWATHS TO NARROW WINDROWS Choose between the chevron intermeshing rubber or steel rolls, or the LeaningEdge™ flail tine conditioning system. Enhanced swath control surfaces behind the conditioning system result in neater-looking swaths with improved dry down.
