### **Product Description**

## **CID X-Treme Duty 36\" Trencher Attachment without Chain**

Our X-treme Skid Steer Trencher is ideal for quickly trenching water lines and cable lines. With options for a dirt chain, 1/2 rock & frost, or full rock & frost, we have the right chain for your trenching needs. There are two arm sizes for different digging depths and chain widths of 36\" or 48\". These trenchers come with a full rock guard and offer flow options of 15-20 GPM or 20-30 GPM, featuring a 15\" auger. The chain guard can be removed for getting right up alongside buildings or structures for less finish digging. The trencher also features easy tightening, and replacable blades for the chain.
