Product Description

CID Heavy Duty 96" 6-Way Dozer Blade

Our HD 4-Way and 6-Way Dozer Blades are excellent tools for grading. Effortlessly cut roads, level ground for building, or dig ditches. These dozer blades feature an electric over hydraulic valve to operate the tilt function, requiring only one set of auxiliary hydraulics. The 4 Way rotates in 4 different directions. The 6 way rotates in 6 different directions for added functionality. Consult the specification or manual sheet for specifics or questions.
