Product Description

CID 96" High Capacity Snow-N-Litter Bucket Attachment

The CID High Capacity Snow-N-Litter Bucket was built to handle large volumes of material. We've found that many farmers often use for litter and not just snow applications. This bucket has viewing slots in the back, allowing line of sight with the edge. With a 31" height and 40" depth, the high capacity bucket will make transportation of light material more efficient. The bucket is constructed of 3/16th" steel with a 3/4 x 6 cutting edge
