Product Description

CID Severe Duty 78" Brush Cutter Bent Axis Piston Motor

The CID Severe Duty Piston Cutter is powered by a Parker bent axis piston motor that provides a continuous cutting capacity of 10 inches for quick and efficient brush cutting. The 72” cutter features up to four blades and 16 mulching teeth, while the 78” cutter has up to four blades and 20 mulching teeth, both offering ultimate mulching capability. This attachment requires a case drain. We also strongly recommend using industrial strength doors and protection on your cab for the debris that this will cut!
