Product Description

Werk-Brau: Excavator Ditching Cleaning & Grading Bucket

Recommended Applications

Specifically designed for ditch maintenance and construction. Also useful in grading and slope work. For high capacity buckets, use the next weight class up in Ditching Bucket, except long reach machines. Werk-Brau manufactures a severe duty version of this bucket.

Quality Construction

Werk-Brau manufactures this bucket using T-1 steel in all high wear components to ensure that the bucket will have a long operating life. A rigid top section assures structural stability in the wider sizes. The bottom of the bucket is reinforced with wear straps. Each bucket is engineered with tapered side plates to reduce wear on the buckets sides, and to allow for easier dumping.

Cutting Equipment Options

Teeth are not used on these buckets due to the application.
